

Presentation Skills

Session Learning Objectives:

By the end of this session, participants will be able to:

- 1 Identify the characteristics of effective presenters and distinguish strong from weak presentation practices.
- 2 Plan and structure presentations with clear openings, logical bodies, and purposeful closings.
- 3 Apply visual-aid principles to reinforce key points and improve audience understanding.
- 4 Demonstrate effective verbal and nonverbal delivery in face-to-face and virtual presentations.
- 5 Present a concise, client-focused technical solution and respond to questions professionally.
- 6 Evaluate and refine AI-assisted planning, slide messaging, and rehearsal feedback for accuracy, relevance, and personal voice.

Key topics covered:

- Characteristics of Effective Presenters
- Planning for the Audience
- Presentation Structure: Opening, Body, and Closing
- **AI Activity: Build a Client-Focused Presentation Plan**
- Visual Aids and Infographics
- **AI Activity: Turn Dense Content into Clear Slide Messages**
- Nonverbal Communication and Tone of Voice
- Delivering Virtual Presentations
- **AI Activity: Rehearse and Improve Your Delivery**
- Handling Questions and Difficult Situations
- Final Practice and Feedback

Module 1: Characteristics of Effective Presenters

CAUSES OF THE AMERICAN REVOLUTION

RANJIT SINGH
PUBLIC SPEAKING 101

What do you think of his presentation?

Characteristics of Effective Presenters

Confident

Enthusiastic

Credible

Organized & well structured

Can use storytelling skills

Has ability to connect with audience

Let's Practice

Present a technical idea in 1 minute!

Module 2: Planning and Structuring the Presentation

What elements should you think about when planning for the presentation?

Planning the Presentation

Purpose

Audience

Channel

Time

Benefits

What do you need to know about your audience?

Audience

**Audience
Background**

Audience size

**Audience
Industry
Knowledge**

**What's in it for
them**

Activity – Use AI to Build a Client-Focused Presentation Plan

1

Define the audience and outcome

Describe the client, their needs, and what they should understand, decide, or do.

2

Share your verified technical inputs

Provide the idea, facts, constraints, benefits, and evidence. Remove confidential data.

3

Generate a three-part outline

Ask for an opening hook, three body points, a closing action, and likely questions.

4

Review and humanize

Check accuracy, relevance, and sequence, then rewrite the outline in your own voice.

READY-TO-USE PROMPT

"Act as a presentation coach. I need to present [technical idea/solution] to [client/audience]. Their main need is [need], and my goal is [decision/action]. Using only the verified information below—[facts/evidence]—create: 1) an opening hook, 2) three body points focused on client value, 3) a closing recommendation, and 4) three likely audience questions. Flag missing information and do not invent facts."

✓ **Output: a client-focused presentation outline**

Presentation Structure

1. Presentation Opening

A. Introduction and Welcome

- Start your presentation with a welcome and a quick introduction of yourself by giving background information on who you are.
- Also, thank your audience for their time and acknowledge their efforts and participation in the presentation.

1. Presentation Opening

B. Grabbing Attention

- Present an interesting question or problem.
- Show an interesting statistic, chart or image.
- Quote an influential or interesting person.
- Share a story that leads to the main topic of your presentation.
- Show a video that relates to the topic of the presentation

1. Presentation Opening

C. Agenda

- Present an outline of the main ideas you will cover in the presentation
- This will keep your audience focused on the presentation topics.

Example of Openings

Question

- Ask a rhetorical or literal question. When someone is posed with a question, whether an answer is called for or not, that person intuitively answers.
- ***“How will AI change the way we work in the future?”***

Example of Openings

Powerful Statement/Statistics

- “Did you know that.....?”
- *“Egyptian governmental companies have shifted to automation using ERP systems in 2024”*

Example of Openings Storytelling!

2. Body Outline

Group Discussion

Think of the points that you should cover when resending a solution to a client.

Client Solution Outline

- Customer needs
- Features
- Benefits
- USP's
- Timeline/Implementation plan
- Financial offer (if applicable)

REMEMBER Keep it Simple

- Follow the “10-20-30” rule.
- Keep your main ideas to three or fewer key points. Mention them at the beginning and end of your presentation to ensure the audience remembers the most important message.

3. Closing

CONCLUSION

- Provide a summary of ideas
- End with a key message
- Allow questions

Handling Questions

- Allocate some time for your audience to ask questions.
- This can help you conclude your presentation and offer clarity to your audience about your solution and how you can benefit them.

Chat Activity:

Write 1 tip on how to handle questions.

BREAK TIME (15 Mins)

Using Visual Aids

- Reinforce and clarify key points.
- Engage audience's eyes and ears.
- Improve understanding and retention.
- Create consistency and balance.
- Inspire confidence in message legitimacy.

7 Tips for Visual Aids

1. Keep it short and simple
2. Make it readable
3. Use the 6x6 rule
4. Use appropriate size and font
5. Check colors
6. Proofread
7. Use animation carefully

Visual Aids Tools

Online presentation software allows users to connect with their audience engagingly. These tools also incorporate images, create movement, and work across many platforms.

Prezi

Canva

Storydoc

POWTOON

SlideDog

Infographics

Activity – Turn Dense Content into Clear Slide Messages with AI

1

Paste one dense section

Choose a verified paragraph from your presentation and remove confidential information.

2

Find the one takeaway

Ask AI to identify the single message the audience must remember from the section.

3

Create slide-ready copy

Generate one takeaway title and no more than three concise supporting bullets.

4

Choose and verify the visual

Request a suitable visual type, then confirm that it matches the evidence and purpose.

READY-TO-USE PROMPT

"Act as a presentation design coach. Rewrite the verified content below for one slide. Return: 1) a takeaway title of no more than 10 words; 2) up to three bullets, no more than 10 words each; 3) the most suitable visual type and why; and 4) a 30-second speaker explanation. Preserve the meaning, flag unsupported claims, and do not invent data. Content: [paste content]."

✓ **Output: a clear slide message and visual direction**

Module 3: Delivering Presentations

Nonverbal Communication

Body Language

Eye
Contact

Posture

Hand
Movement

Body Language

Body Language

Tone of Voice

PRONUNCIATION

PITCH

PACE

PROJECTION

PAUSE

Let's Practice

the Voice

Delivering Virtual Presentations

1. Proper Webcam, Lighting & Internet Connection

- First, check your webcam and lighting. Before you present, turn on your webcam and make sure you're visible.
- Use this time to also check your microphone and audio source.
- Check the background.
- Know the platform used.

2. Talk to the Camera

- Keep eye contact with the camera.
- If you're simply reading from a screen, it makes it seem like you're not confident in the content you're presenting.

3. Show Enthusiasm

- Displaying your interest and care for the topic or information you are presenting will engage and capture the audience's attention.
- People enjoy listening to people who are genuinely excited about sharing their knowledge with others.

4. Use Your Voice Effectively

- Use a strong & confident speaking voice
- Vary your intonation
- Practice, practice, practice

5. Be Yourself

- The most important tip of them all is to be yourself.
- When you're yourself, you'll be more genuine and credible.

Activity – Rehearse and Improve Your Delivery with AI

1

Record or transcribe 60–90 seconds

Deliver part of your presentation, then paste the transcript without confidential details.

2

Request rubric-based feedback

Ask AI to score clarity, structure, audience focus, concision, and tone from the transcript.

3

Improve the weakest passage

Review the evidence behind the scores and revise only the section with the highest impact.

4

Deliver again and compare

Rehearse once more, then use human feedback for pace, eye contact, posture, and presence.

READY-TO-USE PROMPT

"Act as a presentation rehearsal coach. Review this 60–90 second transcript for [client/audience]. Score each area from 1–5: clarity, structure, audience focus, concision, and confidence/tone. Cite one specific example for each score. Suggest the three highest-impact improvements, then rewrite only the weakest passage in a natural voice. Do not add facts. Transcript: [paste transcript]."

✓ **Output: a feedback rubric and one revised passage**

Handling Difficult Situations

What would you do if ...?

1. You don't know the answer to a question that the audience asks.
2. You forget during the presentation.
3. The client comments on a mistake you made during the presentation.

Final Practice

In 2 minutes, using your webcam, present a technical idea/solution to a client.

Recap

Now we know how to:

- Prepare content of virtual presentations
- Deliver virtual presentations effectively
- Present solutions to clients
